

A Collection of Peer Project Reviews

About Group 2's Glitch Project:

Elliott- the flowers part is amazing! how did you get the timer and blackbar pieces?

About Group 3's Glitch Project:

Elliott- how did you get that cursor? very creative format!!

About Group 5's Glitch Project:

Elliott- this is awesome!! I really loved how coordinated and polished the graphics look

About a Twine Project:

Elliott D.- I think the background images are awesome and help immerse you right away. The timer makes it all feel way more stressful too. The ambiance sounds are lovely! The puzzle was neat but a little confusing. Maybe in the puzzle itself there could be more images to guide the user? Also, maybe the hint beforehand could be an image of letters carved into the generator instead of text? The computer terminal details were great and the plot twist end was super cool!

About Another Twine Project:

Elliott D.- I absolutely love how detailed your story is!! I can't wait to see what it looks like when you're more finished with the design aspects.

About Another Twine Project:

Elliott D.- the animated background was really cool! I like the turns of the story, and its also very detailed. making a next button might be good. I can tell that, when complete, the videos will be carefully timed and planned out. Adding audio would be really cool too.
